

# Marine Tie Down MTD12

REF: AW 161

## Over Centre Marine Tie Down.

The strap consists of two parts, a fixed end and an adjustable end.

- Position the Over Centre Buckle laying flat with the fixed end of webbing off to the left.
- Pull the release lever out (this has a thin slot in it) and open the handle till it lays off to the left side.
- The base of the buckle has two rectangular slots in it.
- With the free end of the adjustable strap place it downwards through the first (right side) slot of the base and up through the second (left side) slot of the base.
- The handle has a rectangular slot midway.
- Then place the webbing through the slot of the handle and down under the roller of the buckle and pull it out along the buckle.
- The free end of the webbing strap should now be on the top of the same webbing strap.
- Simply pull any excess webbing through the buckle and then close the handle down until it locks into itself.
