

Marine Tie Down MTD17 & MTD31

REF: AW 162

Over Lever Marine Tie Down.

The strap consists of two parts, a fixed end and an adjustable end.

- Position the Over Lever Buckle laying flat with the fixed end of webbing off to the left and the lever / handle lying onto of the webbing.
- The base of the buckle has two rectangular open slots in it.
- The handle has an indent showing on its face
- With the free end of the adjustable strap place it upwards through the second (left side) slot of the base and back down through the second (right side) slot of the base.
- Pull the webbing through the buckle.
- The free end of the webbing strap should now be on the top of the same webbing strap.
- Connect the strap at both ends by using the S hooks.
- Simply pull any excess webbing through the buckle and then close the lever / handle down 180 degrees until it locks over itself.
